

# Animal Spirit Guides: An Easy To Follow Guide On Discovering And Harnessing Your Power Animal

What Is Your Animal Spirit? Animal spirit can be termed as any force that drives a person to do extraordinary things or acts that are dangerous or of too much risk to a normal human being. The power of animal spirits can also refer to the confidence that a person has when undertaking anything in life. For example for any type of business to prosper then the business person must have an animal spirit. The spirit of not caring about what will happen if all goes wrong. But always mind the positive. This is taking risks in business. What probably will be his returns? Lets take an example of someone who invests in real estate in a city like San Francisco. The city is well known for earthquakes as evident from the recent years. The investor who is setting up the buildings is at a very high risk of losing all of them in the case of an earthquake. But lets take a look on the other side of the matter. The person will be enjoying a very fat income from his project for a very long time if there are no earthquakes for a long period of time. The high population in the city will obviously return to him the capital he spent and redouble it in a short period of time. Now this is the power of animal spirit. Risking the little you have in business for a higher income in future. Thus for the worlds economy to flourish, many people need to have animal spirits and take risks in their businesses. The worlds most successful businessmen took very high risks in their first phase of their career, risking almost everything that they have. But unfortunately they made it. This thing is physiological and people need to be informed about it.
