

Cases in Advertising Management

Cases in Advertising Management offers a wide range of short, medium-length, and longer cases, all designed to illuminate the topics covered in an Advertising Management course. The book can stand alone, or, for instructors who wish to incorporate a combined casebook and textbook approach, it can be adopted alongside any standard text, including Advertising Management by the same authors. The book features actual real-life cases that reflect current trends in the advertising and promotion industry, with a strong emphasis on digital media and integrated marketing communications. A detailed introduction (How to Analyze a Case Study) is followed by 30 cases, covering a full range of topics for a semester-long course, including financial management, business planning, strategic planning, budgeting, human resource management, and managing change.
