

Being of Man and His Future Evolution

Throughout our life, we have to struggle with questions that cannot be answered on the basis of our experience or with our ordinary thinking. Spiritual science can help us penetrate to a realm where new possibilities open up to address these questions. These lectures offer fascinating insights into the spiritual nature of everyday matters such as forgetting, laughing and weeping, different types of illnesses, and rhythms in the bodies of the human being. Steiner shows how we can become, through our own efforts, co-creators in evolution.
