

Contemporary Issues in Employment Relations (LERA Research Volume)

In Contemporary Issues in Industrial Relations, a large and diverse group of contributors provides a new thematic treatment of key employment relations issues. These topics include: collective bargaining, worker disability, the return to work, alternative dispute resolution, managerial misclassification and violations of overtime law, new developments in performance-based pay, and retirement from work and managing ones own money. David Lewins introduction integrates these topics, and a closing roundtable chapter provides a range of perspectives on the books themes.
