

# Unemployment and Evolving Labor Markets in Central and Eastern Europe. (Licos Studies on the Transitions in Central and Eastern Europe, V. 4)

Following the first uncertain years of the transitions in Central and East Europe, this collection of thematically unified papers describes and analyzes the issues of unemployment, employment policy and labour market developments. The book surveys the state of the labour market in Romania, the former Czechoslovakia, Slovenia, Poland and Hungary, with overviews by home-country experts. The book is introduced by a comparative overview of the different types of policies used in Central and Eastern Europe.
