

The Big Hot: Love in a Time of Global Warming

In a time of cataclysm from Global Warming, a group of people gather to form a tribe, based (without them knowing it) on the tribes of the Paleolithic in Europe. All modern notions of ego, marriage, property are tossed aside as they embrace a new ethos of behavior, sexuality and spirituality as well as a rediscovered sense of loyalty to members of the tribe, both out of love and out of survival. As 98% of humanity dies back at the heed of natural selection, survivors find vast new psychic space to create a new world, one in which humanity will walk in balance.
