

How to Raise the Vibration Around You: Volume I: Working with the 4 Elements to Create Healthy and Harmonious Living Spaces

This book will change the way you look at your home and work environments and all spaces you occupy as you realize the power you have to change and improve your surroundings naturally, while working with the four elements. Nature has provided us with a bounty of natural ways to maintain health and harmony, and in this new release, author Dawn James eloquently shows you how to raise the frequency in your home, work space, and general surroundings using the elements of Air, Light, Water, and Earth's gifts. In *How to Raise the Vibration Around You, Volume I*, Dawn shows you how to improve air quality, physically and aesthetically; be aware of beneficial and harmful lighting; work in harmony with the sun and the moon; raise the frequency of your water for drinking, bathing, and cleaning; and work with Earth's gifts to positively transform your life and connect to the elements that we rely on for sustenance and well-being.
