

The Realities of Managing Development Projects

A collection of essays, based on the contributions of experts, that offers a novel multi-dimensional analysis of the situation in developing countries. It potrays a realistic view of the present and possible future trends in the management of development projects. It also examines the role of project managers and the development of the implementing organizations, their role in developing countries, the planning and implementation of development projects and the future of project management in developing countries as a whole. Conclusions point out the need for changes of attitude and the adoption of a professional approach.
