

Post-Capitalist Society

Business guru Peter Drucker provides an incisive analysis of the major world transformation taking place, from the Age of Capitalism to the Knowledge Society, and examines the radical affects it will have on society, politics, and business now and in the coming years. This searching and incisive analysis of the major world transformation now taking place shows how it will affect society, economics, business, and politics and explains how we are moving from a society based on capital, land, and labor to a society whose primary source is knowledge and whose key structure is the organization.
