

Life After Death: A Survey of the Cumulative Evidence

Do you know what happens to you when you die? Do you fear death because you believe it is the end of everything for you or is there something beyond death? Is there a Heaven? Is there a Hell? If so, where is it? Are those who commit suicide the clever ones, escaping all worldly woes? Is communication with the dead possible or is it all just one big fraud foisted on a gullible public? These questions and many more are answered in this intriguing, down to earth book by an attorney who, out of sheer curiosity, researched and analyzed the evidence of the past 150 years. What is behind some of the mysteries that have baffled our scientists for centuries, such as the Abominable Snowman (), The Loch Ness Monster, The Bermuda Triangle, UFO Abductions, Poltergeists, Psychic Phenomena? Are they connected in any way to a science of another world? The author found the answers to those questions and offers them in a coherent and interesting presentation.
