

# Mending Manufacturing: How America Can Manufacture Its Survival

Mending Manufacturing is the most comprehensive book to cover all aspects of the crisis in American manufacturing. The author stresses the United States is facing a manufacturing emergency, and unless Washington acts swiftly and decisively, the U.S. could plummet into a second-class industrial power. It reveals the history behind the industry's outsourcing of jobs and production to foreign nations, and questions whether the U.S. can sustain as an economic power without a solid manufacturing base.
